SIMPLIFYING HEALTHCARE

5 REASONS CCM & RPM ARE ESSENTIAL TO YOUR HOSPITAL'S FUTURE

LEADING THE VIRTUAL HEALTHCARE REVOLUTION

WHO ARE WE?

Aura Health Solutions is a healthcare technology company driven by the power of precise data and analytics. We are committed to real-time communication, education, and the emotional and physical well-being of our clients.

Our purpose is to work with healthcare providers to deliver remarkable value-based care, seamless population health, increased operational revenues, and significantly improve patient outcomes using data based solutions.

WHAT DO WE DO?

Aura Health Solutions is a innovative healthcare enterprise that is nimble, personal, and targeted in our approach. We ensure that our partnership delivers the digital touchpoints essential to your hospital's success: Chronic Care Management, Remote Patient Monitoring, Real-time Health Coaching, Telehealth, Mental Health, and Business Intelligence.

We specialize in creating optimized health and wellness programs for the patients and communities you serve, while being able to increase revenues.

1

TIMELY CLINICAL INTERVENTIONS

We help you to get in front of acute situations before they turn into costly episodes of care.

2

VALUE-BASED HEALTHCARE

We design a digital infrastructure that facilitates disease management, decreases clinical time, cultivates relationships, and deploys technology.

3

ACCESSIBLE & AFFORDABLE PRIMARY CARE

Our digital platform makes primary care more patient-centered, accessible, and efficient.

4

REDUCED UTILIZATION & READMISSIONS

Research shows that remote patient monitoring and coordinated communication reduces redundant utilization and hospital readmissions.

5

PATIENT ENGAGEMENT FOR BETTER OUTCOMES

Our technology includes contact with caring people to create the engagement that produces better measurable health outcomes.

SIMPLIFYING HEALTHCARE

**CURRENT 2022-2023
CCM & RPM
HOSPITAL TRENDS**

University of Pittsburgh Medical Center reported that **patient satisfaction scores rose to over 90%** after equipping patients with remote patient monitoring equipment and tablets. Also, according to UPMC, RPM helped to **reduce its readmission rate by 76%**

UPMC
LIFE CHANGING MEDICINE

Boston Medical Group is remotely monitoring the blood pressure of postpartum patients, alongside a healthcare technology company, and has managed to get **some patients treated before suffering strokes**. The medical center has recently expanded the program to monitor patients during pregnancy.

BOSTON MEDICAL CENTER
EXCEPTIONAL CARE. WITHOUT EXCEPTION.

"More hospitals and health systems are expected to use remote patient technology in the future, partly out of necessity. As health systems continue to see a shortage of clinicians, hospitals are going to turn more to remote patient monitoring and telehealth."

Hal Wolf, President of HIMSS.

HIMSS

Health Tech Insider reports that **20% of large healthcare facilities** surveyed said they have already adopted some sort of RPM solution for their organization.

It's time for your hospital and healthcare system to prepare for the future of virtualized, value-based care. Aura Health Solutions is your partner in success.
